Network Security and Logging System

Multiple solutions with one device and one license. XLOG is a firewall with logging and hotspot features.

Next Generation **Firewall**

- Port opening-closing and routing operations are implemented with the Firewall feature.
- System security is ensured by preventing external port-based attacks.
- Group-based rules can be created and the desired rules are applied to the desired groups.
- IPs outside Turkey are blocked by default. IPs outside Turkey are automatically blocked by the system even if the wrong rule is created. (These blocks have been closed by our systems due to the fact that cyber-attacks are largely originating from abroad, and in case our customers need international connections, the necessary IPs are specially allowed.)
- Possibility to manually open a timed port.
- Ability to see IPs connected to ports instantly.
- You can create rules for allowing and blocking traffic access between networks.

Hardware

4xSFP+ 10Gbit

Model	Console Port	USB Port	Gbit Ethernet	SFP	VGA/HDMI Port
8x GE	Yes	2x	8x	4x SFP+ 10Gbit	HDMI

XLOG 10000 FEATURES

Supported Users	10000
Keeping Records	2 Year
Notify Options	SMS/Email
Reporting	Yes
Logging on the Device	Yes
Firewall Performance	Please Ask
Application Performance	Please Ask
NGFW	Please Ask
Ethernet Port	Please Ask
Fiber Port	Please Ask
Hardware	Please Ask

- The device is the best solution for large-scale institutions and businesses. Provides high bandwidth with 10Gbit SFP+ ports.
- All modules are active without need any extra certificate or license.
- Log records are signed automatically with Tubitak Timestamp.
